Michael Angello Qadosy Riyadi

Data Science & Machine Learning Enthusiast | Passionate in
Analytics & Research
Surabaya, Jawa Timur, Indonesia

Ringkasan

A dedicated student in the 7th semester of the Information Technology program at Telkom University Surabaya. Possesses strong interest and skills in machine learning, artificial intelligence, and blockchain.

Pengalaman

FlyRank AI

ML Engineering Internship
Juli 2026 - Present (2 bulan)

Currently interning at FlyRank AI as an AI intern, focusing on Machine Learning.

JTV Rek

Mobile Application Developer
Juli 2026 - Present (2 bulan)

CoE Integrated and Embedded Systems (INTEREST)

Research Assistant (AI & Embedded Systems)
Juli 2026 - Present (2 bulan)

Lumif

Co-Founder Lumif
Februari 2026 - Present (7 bulan)

Badan Pusat Statistik

Research Division at the Telkom University Surabaya Branch of the Central Statistics Agency
November 2025 - Present (10 bulan)

Universitas Telkom

1 tahun 10 bulan

Information Technology Study Program Content Creator

Federated Learning for University
Major Recommendation: A Privacy-Aware Approach for Educational Decision Support

Experimental Evaluation of Smart Contract Gas Optimization Techniques: A Case Study of a Blockchain-Based Reporting Application System

Optimization of dendritic neuron model framework through activation pairing for multidomain medical diagnosis

November 2024 - Present (1 tahun 10 bulan)

1. Create, edit and produce various types of creative content for social media, including promotional videos, entertainment, soft selling, and hard selling.
2. Collaborate with marketing and academic teams to create promotional materials that are relevant to campus activities.
3. Manage Instagram social media accounts to ensure consistency of messages and visual aesthetics that reflect the values and goals of the Information Technology Study Program.

Core Programming Lab Assistant

Agustus 2025 - Januari 2026 (6 bulan)

Literacy and Independence Enhancement Program for Students with Special Needs at SLB Bina Mandiri

Agustus 2025 - Desember 2025 (5 bulan)

As part of the student team in a community service and educational innovation program at Telkom University Surabaya, contributed as an AI Engineer in the development of an AI-powered learning application for students with special needs, with responsibilities including:

1. Developing and integrating Text-to-Speech (TTS) models to support audio-based learning and improve literacy accessibility.
2. Implementing Speech-to-Text (STT) models to enable voice-based interaction and assist students with limited writing abilities.
3. Building Image-to-Text (OCR) functionality to convert visual learning materials into accessible text and audio formats.
4. Collaborating with the application development team to ensure AI features are adaptive, user-friendly, and aligned with the learning needs of students with special needs.

Algorithms and Data Structures Lab Assistant

Agustus 2025 - Desember 2025 (5 bulan)

Prediction of Telkom University Surabaya Major Selection using Federated Learning

Maret 2025 - November 2025 (9 bulan)

As part of the student research team at Telkom University Surabaya, contributed to the research project "Prediction of University Major Selection using Federated Learning: A Case Study at Telkom University Surabaya" (led by Bernadus Anggo Seno Aji, S.Kom., M.Kom.) by:

1. Collecting, preprocessing, and performing feature engineering on datasets for machine learning models.
2. Developing predictive models using Federated Learning architecture.

3. Contributing to academic paper writing and successfully presenting the research at the ICITDA 2025 International Conference.

Smart Hydroponics: IoT-Integrated Monitoring and AI-Driven Growth Forecasting System

Maret 2025 - Juli 2025 (5 bulan)

As part of the student team in the Community Service Program at Telkom University Surabaya, contributed to the "Smart Hydroponics: IoT-Integrated Monitoring and AI-Driven Growth Forecasting System" by:

1. Transmitting IoT sensor data to a database for real-time storage.
2. Training a Prophet-based AI forecasting model using database data to predict plant growth.
3. Developing a Node.js website to read database data and integrate the AI model for real-time monitoring and insights.

SIREGA Application Software Program (Grabagan Village Spatial Planning Information System)

Maret 2025 - Juli 2025 (5 bulan)

As part of the student team in the Community Service Program at Telkom University Surabaya, contributed to the "SIREGA, a mobile application to streamline RT/RW administrative processes in Desa Grabagan, Sidoarjo" by:

1. Designing and developing interconnected user and admin mobile applications using Flutter, integrated with Firebase Realtime Database for seamless data synchronization and authentication.
2. Implementing automated PDF letter generation based on user-input data, enhancing administrative efficiency and accuracy.
3. Integrating QR code generation as a digital signature alternative, ensuring secure and verifiable document authentication.

Statistics and Data Analytics Lab Assistant

Maret 2025 - Juni 2025 (4 bulan)

Programming Algorithm Lab Assistant

Februari 2025 - Juni 2025 (5 bulan)

Basic Artificial Intelligence Lab Assistant

Februari 2025 - Juni 2025 (5 bulan)

Computer Network Lab Assistant

Februari 2025 - Juni 2025 (5 bulan)

Beasiswa Kementerian Komdigi

Digital Talent Scholarship Machine Learning Training 2025 BPSDM Komdigi RI

Juli 2025 - Desember 2025 (6 bulan)

1. Completed Data Science & Machine Learning fundamentals, learning algorithms and industry applications.
2. Built predictive models and delivered business insights in real-world ML projects.
3. Competed in ML Hackathons, developing creative solutions for complex data challenges.

Hacktiv8 Indonesia

Student Developer Initiative Data Classification and Summarization Class

Juni 2025 - Juni 2025 (1 bulan)

1. Classifying and summarizing text data using IBM Granite models.
2. Designing the architecture and adjusting model parameters.
3. Deriving insights, conclusions, and recommendations from data to support decision-making.

VINIX7

Junior Data Scientist - Merdeka Belajar Kampus Merdeka (MBKM)

Februari 2025 - Juni 2025 (5 bulan)

1. Conduct data analysis to identify patterns, trends, and insights, including data preprocessing.
2. Develop predictive models.
3. Create analytical reports and present findings to mentors.

PT Bima Digital Indonesia

Frontend Web Developer

Januari 2025 - Juni 2025 (6 bulan)

1. Work within time to complete website development projects, including creating company profile pages using Tailwind and Next.js.
2. Create evaluation reports and presentations of work results to mentors, and participate in comprehension tests at various stages of the program.

Mereka

AI Volution

Desember 2024 - April 2025 (5 bulan)

1. Be selected as a participant in the AI-volution program, an initiative to empower Indonesian youth with AI skills to create positive social impact.

2. Attend interactive virtual workshops and self-paced online modules, learning about AI concepts, machine learning, and ethical applications in the real world.
3. Selected to participate in face-to-face workshops at American Spaces, collaborating on solving real-world challenges using AI technology.

Bukit Vista - Hospitality Service

Data Scientist

Januari 2025 - Februari 2025 (2 bulan)

1. Conduct data analysis to identify data patterns, trends, and insights, including data preprocessing.
2. Create analysis reports and presentations of work results to mentors.

SabiKerja

Fullstack Web Developer

Januari 2025 - Februari 2025 (2 bulan)

1. Identified key issues on the old website, such as slow performance and confusing navigation.
2. Optimized website performance, reducing the main page loading time from 5 seconds to under 3 seconds.
3. Conducted cross-browser testing and iterations to ensure compatibility and consistent appearance.

Home Credit Indonesia

Data Scientist - Project Based Internship

Desember 2024 - Januari 2025 (2 bulan)

1. Develop Machine Learning modeling products: Home Credit Indonesia Scorecard Model, including end-to-end implementation and business insights for card score prediction.
2. Create analysis reports and presentations of work results to mentors.

Rakamin Academy

1 bulan

Data Scientist - Flexible Kickstart Data Science Journey Rakamin Academy

Desember 2024 - Desember 2024 (1 bulan)

1. Received Excellent Grade after completing a 1-month intensive Data Science program that focuses on using Python for data analysis.
2. Learned Python libraries for data processing, data cleaning, data manipulation, and data analysis.

Fullstack Web Development - Flexible Kickstart Fullstack Web
Development Journey Rakamin Academy
Desember 2024 - Desember 2024 (1 bulan)

1. Received Excellent Grade after completing a 1-month intensive Fullstack Web Development program that focuses on both front-end and back-end development.
2. Learned key technologies for front-end and back-end development.

Samsung Innovation Campus
AI/ML Engineer
Maret 2024 - Agustus 2024 (6 bulan)

1. Selected as one of 252 from 5,000 participants for the opportunity to engage in advanced learning.
2. Completed intensive training focused on technology development, innovation, and programming skills in the fields of AI, ML, and IoT.
3. Played the role of an AI/ML Specialist in the development of the Capstone Project as part of the final assessment, achieving a Top 5 of 1250 Teams.
4. Scored 94 out of 100 based on a series of evaluations and assignments throughout the program.

Pendidikan

Universitas Telkom
Teknologi Informasi · (September 2023 - 2027)

Oxford Home Study Center OHSC
Cyber Security Diploma (Course) · (Januari 2024 - April 2024)
